

The electronic textbook "Practical Skills in Propaedeutics of Internal Diseases: electronic manual" has been published. The manual is recommended for foreign students of the II and III courses of the specialties "General Medicine" and "Dentistry" of the Faculty of Medicine, studying in English.

The publication contains information about the procedure for performing the basic practical skills necessary for the clinical examination of a therapeutic patient, both by the direct participation of the teacher, and independent study of the subject.

Authors: employees of the department of propaedeutics of internal diseases with a course of radiation diagnostics - candidate of medical sciences, associate professor Sapozhnikova Svetlana Yuryevna, senior lecturer Vasilyeva Lidia Nikolaevna; senior teacher Ksenofontova Alla Gennadiyevna, assistant Mishin Alexander Olegovich.

An electronic study guide for students can be obtained from the library of the Faculty of Medicine.

The staff of the department congratulates colleagues on the publication and wishes them further success in their work!
